

SELLER PARTNERSHIP PROPOSAL

Grow Your NFC Card Business with SabiCard

A partnership proposal for ID, calling card, business card, and NFC product sellers who want to issue smart digital cards with a managed activation platform.

Prepared by:

SabiCard

Platform:

<https://www.sabocard.app>

Program:

Seller Credit MVP

Document date:

June 9, 2026

Executive Summary

SabiCard gives sellers a simple way to sell NFC-enabled digital business cards without building their own software platform. Sellers register cards using credits, encode the SabiCard tap URL to physical NFC cards, and let customers activate their own accounts.

The goal is to help sellers offer a modern, recurring, and professional NFC card product while SabiCard handles the activation, dashboard, profile, analytics, and card management experience.

Who This Is For

ID and Card Sellers

Businesses that already print IDs, calling cards, membership cards, or PVC cards.

NFC Product Sellers

Sellers who provide NFC cards, tags, stickers, or smart profile cards.

Local Print Shops

Shops that want to add digital card activation to their physical card service.

Corporate Suppliers

Suppliers serving teams, events, organizations, and business clients.

Seller Value Proposition

- Sell a higher-value NFC product instead of only a printed card.

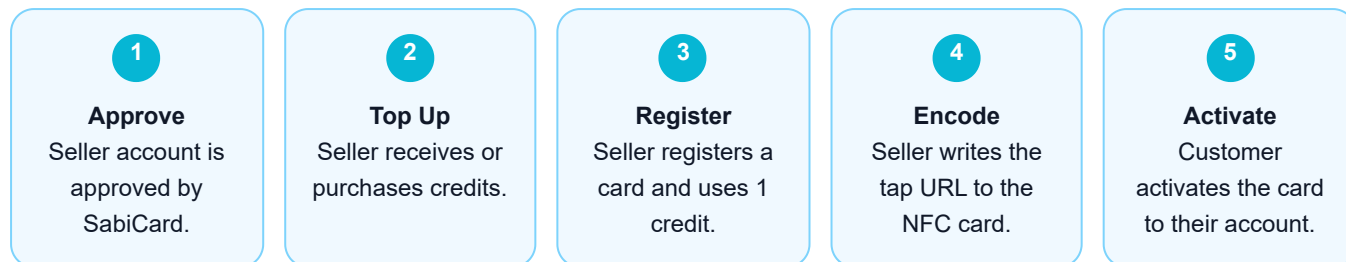

SabiCard

Seller Partnership Proposal

- Use credits to control cost and inventory without complex billing at launch.

How the Seller Program Works

Core rule: One successfully registered card uses one seller credit.

Action	Credit Effect	Business Meaning
Seller receives 100 credits	+100	Seller can register up to 100 cards.
Seller registers one NFC card	-1	A sellable card record is created in SabiCard.
Customer activates the card	No change	Customer claims the already registered card.
Admin support adjustment	+/- manual	Used for approved support, replacements, or corrections.

Recommended Pilot Offer

Starter Pilot

- 10 to 25 trial credits
- Seller dashboard access
- Basic onboarding guide
- Manual support during pilot

Production Seller

- Prepaid credit bundles
- Dashboard monitoring
- Card activation tracking
- Support for credit adjustments and disputes

Seller Responsibilities

- Use SabiCard only for legitimate customer card transactions.
- Encode the correct tap URL to each physical card.
- Test cards before releasing them to customers.
- Protect customer information and avoid collecting customer passwords.
- Contact SabiCard for replacements, disputes, or suspicious activity.

SabiCard Responsibilities

- Provide the seller dashboard and card registration platform.
- Maintain card activation and customer account workflows.
- Track credit ledger entries and card ownership.
- Provide support for approved credit adjustments and account issues.

Continue reviewing the seller platform based on pilot feedback.

The final pricing can be adjusted after the pilot, but the recommended structure is a prepaid credit model.

Commercial Item	Suggested Approach
Seller access	Approved manually by SabiCard during MVP.
Card creation	1 credit per registered card.
Credit purchase	Prepaid credit bundles.
Trial sellers	Limited free credits for testing and feedback.
Replacement cards	New card uses a new credit unless SabiCard grants an adjustment.
Suspension	SabiCard may suspend sellers for misuse, unpaid usage, or policy violation.

Success Metrics for Pilot Sellers

- Number of cards registered by the seller.
- Number of cards activated by customers.
- Time from card registration to customer activation.
- Seller support issues encountered.
- Customer confusion during activation.
- Seller willingness to buy additional credits.

Terms and Conditions Summary

- SabiCard seller access is subject to approval and continued compliance.
- Sellers may not use the platform for spam, fraud, misleading claims, or unauthorized links.
- Sellers must not create customer accounts without consent or request customer passwords.
- Credits are consumed when cards are successfully registered.
- SabiCard may review card, credit, and activation history for support and abuse prevention.
- SabiCard may suspend seller access to protect customers or the platform.

Next Steps

1. Confirm seller interest and business details.
2. Create or identify the seller SabiCard account.
3. Approve seller access and assign pilot credits.
4. Complete onboarding using the Seller Guide.
